

Prompts — Lab 04: Turn the Brochures into a SQLite Knowledge Base

Surface: Codex. Paste each prompt as written; change only what the lab tells you to.

PROMPT — Codex

Write scripts/build-kb.mjs and an npm script "build:kb" that builds data/academy.db.

- Use @sqlite.org/sqlite-wasm (the official build, which includes FTS5) – the same engine the browser will use.
- Split every Markdown file in kb/ into one chunk per "## " section. Keep the document title.
- FTS5 table chunks(doc_id UNINDEXED, title, section, body, url UNINDEXED) with tokenize='porter unicode61'.
- A normal table courses(...) from data/courses.csv for fee and date questions.
- Write the file with sqlite3_js_db_export.

Then test: "refunds", "nut allergy macaron", "Bukit Timah parking" – show the top hit for each.
