

Prompts — Lab 06: Add ChatGPT Mode, Then Try to Break It

Surface: Codex. Paste each prompt as written; change only what the lab tells you to.

PROMPT — Codex

Add a ChatGPT mode to the course assistant.

- A settings panel: API key (password field) and model (default gpt-6-luna). Store the key in sessionStorage ONLY. Never in code, localStorage or the repo.
- On a question: retrieve the top 3 chunks, then POST <https://api.openai.com/v1/responses> with instructions from grounded-prompt.md and the chunks as numbered sources.
- Show the answer with its [n] citations.
- On any API error, fall back to search mode.
- Retrieval with no hits → refuse without calling the API.
