

Prompts — Lab 10: A Workshop Popup and a Hook That Checks Every Edit

Surface: Codex. Paste each prompt as written; change only what the lab tells you to.

PROMPT A — the workshop popup

Add a workshop invitation to the home page.

When a visitor has been on the page for 10 seconds, open a friendly popup with:

- Title: Free 1-hour Pastries Workshop & Treat
- When: next Wednesday, 1:00-2:00 PM
- Where: our Bukit Timah campus
- Ask: Keen to join?

Add a short form: name, mobile and email, and a "Count me in" button.

- Mobile: Singapore, 8 digits starting with 8 or 9.
 - Save sign-ups in the browser like the course sign-ups, then say thank you.
 - Show it once per visitor. Close with X or Esc.
 - Accessible: labels, and focus inside the popup.
- No libraries. Then tell me how to test it.

PROMPTS B and C — the hook

PROMPT B

Add a hook to this project: every time you finish editing a file, run `npm run check`. If it fails, tell me which test failed and fix it before you carry on. Set it up for me — I don't need to see the configuration. Then tell me in two sentences what the hook does and how to switch it off.

PROMPT C

In `kb/brochures/BAK-104.md`, change the allergen line to say the Macaron Masterclass is nut-free.
